

DO YOU HAVE 20/20 VISION?

WHAT IS 20/20 VISION?

It's the sharpness of your eyesight at a distance of 20 feet.

You can have 20/20 vision but also have:

Cataracts

Clouding of the eye's natural lens.

Glaucoma

Progressive damage to the optic nerve.

Diabetic Retinopathy

Damage to the blood vessels of the retina.

Make your eye health a priority. Book an appointment today: www.opto.ca/find_doc

2020: Your sight is our vision.
